

# HOBART **BIM**

Hobart BIM is a community led forum to foster the use of Building Information Modeling and Computational Design within the built environment industry.

6:00PM, WEDNESDAY 3RD JULY 2019

**Brickworks Hobart Design Studio**  
**9 Franklin Wharf, Hobart**

Our desire for HobartBIM is to provide a free bi-monthly gathering for like-minded and curious individuals to discuss their successes, desires and learnings on a range of topics including but not limited to; building information modeling, computational design, digital fabrication, virtual & augmented reality, reality capture and facility management.

Our aim is to welcome users of all professions, experience and technology platforms whilst remaining vendor neutral.

We will kick off our inaugural event at 6pm on the 3rd of July at the Brickworks Hobart Design Studio. Klaus Stroehl (Gandy & Roberts) and Michael Carlotto (TERROIR) will host the evening as they discuss the opportunities they see for the Hobart community, industry trends and how the user group may grow over the coming months.

Please visit the event page for further details and be sure to register for a **FREE** ticket for our first event!

A special thank you to Brickworks Hobart for hosting our inaugural event.
